ECB6200

Quick Start Guide

MoCA Network Adapter

Congratulations! You've successfully connected your device to the Internet.

Additional MoCA Network Adapters may be purchased and connected to other devices needing an Ethernet connection and that are near a coaxial port.

This Quick Start Guide will walk you through the steps of connecting ScreenBeam MoCA Network Adapter to expand your Internet coverage.
Tech Support

Package Contents:

(1) MoCA Network Adapter	**(1)** Coaxial Cable
(1) Ethernet Cable	**(1)** Coax Splitter
(1) Power Adapter	

Connect ScreenBeam MoCA

MoCA-ready network

Coax

Ethernet Cable

Power

MoCA Network Adapter

Coaxial wiring
behind the wall

Notes: A MoCA splitter is required if there is an existing
device using the coax connection (i.e., Set-top box or TV)

IMPORTANT: An existing MoCA-ready network or another ECB6200
Adapter is required. Internet availability should be delivered from your
Internet service provider device (i.e., Cable or Fios modem/router).

a Locate an available Coax Outlet in the area you would like
to expand your Internet.

*NOTE: Use the provided MoCA splitter if there is an existing device using
the coax connection (i.e., Set-top box or TV).*

b Connect the coaxial cable from the Coax Outlet to the ECB6200
Adapter's Coax In port.

c Connect the power for the ECB6200 Adapter.

d Wait until both the Power and Coax lights turn GREEN.

e ECB6200 Adapter is now bridged to your existing network.

f Connect the Ethernet Cable from the Network Adapter
to a Networking Device of your choice.
