I've inserted the software CD into the CD-ROM drive, but it doesn't install. What should I do?

In Windows Explorer, browse to the CD-ROM drive (e.g., D:), then locate and double-click on the "Setup.exe" file.

Should I be concerned if Windows' firewall or anti-virus software warns that ScreenBeam is trying to open a port?

ScreenBeam requires Windows to temporarily open a port to stream content to the TV. Click **Allow** when the message appears.

My laptop/PC displays the following message: "Color scheme has been changed." Is this a problem?

No. Select "Keep the current color scheme and don't show this message again."

Why am I unable to play a DVD or Blu-ray disc when connected to ScreenBeam?

Currently, ScreenBeam does not support the streaming of protected content such as DVD/Blu-ray movies, TV shows, etc.

Go to [www.actiontec.com/screenbeamusb](http://www.actiontec.com/screenbeamusb) for product support, updates, and more information, including:

- User Manual
- FAQs

### Frequently Asked Questions

ScreenBeam displays a screen that seems to be larger than my TV can handle. How can I fix this?

Right-click the ScreenBeam icon in the Windows system tray, at the bottom right of the desktop. A menu will appear. From the menu, select **Preferences**, then adjust the screen size.

I'm seeing a mosaic display on my HDTV. What should I do?

First, make sure the laptop/PC meets the recommended system requirements. If you're seeing a constant mosaic picture, disconnect, then reconnect the ScreenBeam connection. Also, make sure the Wireless Display Receiver is not hidden inside a cabinet, as this can reduce performance.

How can I update my ScreenBeam Wireless Display software?

Open the ScreenBeam Wireless Display application. Right-click on the ScreenBeam Receiver you've previously connected to and select "Check for updates...". Make sure the laptop/PC is connected to the Internet.

What should I do if the ScreenBeam Wireless Display software cannot connect or pair with ScreenBeam Receiver?

Reboot the laptop and power cycle the ScreenBeam Receiver. Also, try selecting a different wireless channel before connecting. To do this, from the "Add a Receiver" screen, click on the wireless channel drop-down menu, then select a different wireless channel.

**Step 3** A new screen appears. Select the Receiver, then click **Connect**.

**Step 4** A PIN appears on your HDTV screen.

**Step 5** Enter the **PIN** in the ScreenBeam software application within 60 seconds, then click **Next**.

The ScreenBeam USB Transmitter and Receiver are now paired. You should see the screen of the laptop/PC on the HDTV.

## Welcome!

Congratulations on your purchase of an Actiontec ScreenBeam Wireless Display USB Transmitter. The USB Transmitter enables your laptop/PC to connect with your existing ScreenBeam Receiver and transmits the content on the small screen to your HDTV.

**Important!** The ScreenBeam USB Transmitter only works with the ScreenBeam Wireless Display Receiver. To learn more, go to [www.actiontec.com/screenbeampro](http://www.actiontec.com/screenbeampro)

## A Verify Your Receiver

**Step 1** Make sure the ScreenBeam Receiver being used is model no. **SBWD100A**.

**Step 2** Make sure the **HDTV input** is set to the same **HDMI port** to which you connected the receiver. Then, verify you are seeing the **Ready to Connect** screen on the HDTV.

## B Install the Software and USB Transmitter

This section will guide you through the Wireless Display Software and USB Transmitter setup.

**Step 1** Insert the **ScreenBeam CD** into the **CD drive** of a laptop/PC. An AutoPlay window appears on the screen.

Click **Run setup.exe**, then follow the onscreen instructions.

**Note 1:** The AutoPlay window may look different, depending on the operating system version being used on the device.

**Note 2:** If you don't see the AutoPlay screen, locate the CD-ROM folder from Windows Explorer, then double-click on **setup.exe**. If your laptop/PC has no CD/DVD drive, go to [www.actiontec.com/screenbeamusb](http://www.actiontec.com/screenbeamusb) to download the ScreenBeam software.

**Step 2** When you see the screen shown on the right, make sure you've completed the steps in **Section A** of this Guide.

Then, continue to follow the onscreen instructions.

**Step 3** When you see the screen shown on the right, get the **ScreenBeam Wireless Display USB Transmitter**.

**Step 4** Insert the **USB Transmitter** into a **USB port** on your **laptop/PC**, then click **Next**.

**Note:** If the USB Transmitter was already connected to the laptop/PC prior to step 4, unplug it, then plug it back in.

**Step 5** Click on the button next to "Yes, I want to restart my computer now," then click **Finish**.

The laptop/PC reboots.

**Note:** Actiontec recommends plugging in your laptop/PC when using ScreenBeam. If running your laptop on battery, make sure its power settings are configured for "Maximum Performance."

## C Pair the Receiver and USB Transmitter

**Step 1** Launch the ScreenBeam Wireless Display application by clicking on the ScreenBeam icon on the Windows desktop, or locate then launch the application from Windows Search.

**Note:** You may encounter a product registration screen requesting for the software registration key. The registration key can be found on the back of the software CD sleeve.

**Step 2** The main ScreenBeam screen appears. Click **Add a Receiver**.
